

SMC Premium/Discount Confluence Engine — v17.19 Completion Report

Date: 2026-05-16

Type: VISUAL-ONLY Update (Zero logic/filter/alert architecture changes)

Previous Version: v17.18

Plot Budget: 33/64 (unchanged)

Delivery Checklist

#	Task	Status
1	Backup v17.18 → smc_premium_discount_indica tor_v17.18_backup.pine	✓
2	Create working copy for v17.19	✓
3	CRITICAL FIX: EQ Label ac- cumulation — Add var label pdEqLabel + la- bel.delete()	✓
4	EQ label padded text " EQ " with dark background (transp 20)	✓
5	EQ line: width=4, color.white, solid, extend.right (verified)	✓
6	HUD background: col- or.new(color.black, 40) — 60% opacity (was 30%)	✓
7	HUD frame border: col- or.new(color.white, 80) — 1px subtle border	✓
8	New input: hudModeInput — “Fixed” / “Hover” options	✓
9	Float Mode logic: Fixed=60% opacity, Hover inactive=15%, Hover active=60%	✓
10	Hover activation: barstate.islast OR recent signal within 5 minutes	✓
11	HUD content rows: size.small (was size.normal) — ~15% width reduction	✓
12	Label shortening: Align, KZ, POI, Confl, AMD, Trade, Entry, Stage, Alert, Signals	✓

#	Task	Status
13	Header row: retains <code>size.normal</code> for prominence	✓
14	Text hierarchy: <code>_lbl</code> (white), <code>_act</code> (lime), <code>_dim</code> (gray 30), <code>_wrn</code> (orange), <code>_inv</code> (red)	✓
15	Alignment row: uses <code>_inv</code> (red) for conflict, <code>_act</code> (lime) for aligned	✓
16	Entry Mode row: uses <code>_dim</code> (neutral grey) for static value	✓
17	Indicator title updated to v17.19	✓
18	HUD header updated to "v17.19"	✓
19	All 4 alertcondition payloads updated to <code>"version": "v17.19"</code>	✓
20	v17.19 changelog added at top of Pine Script	✓
21	End-of-indicator comment updated to v17.19	✓
22	<code>app.py</code> → v17.19	✓
23	<code>src/webhook_server/routes.py</code> → v17.19	✓
24	<code>src/oie_processor.py</code> → v17.19	✓
25	<code>src/decoders.py</code> → v17.19	✓
26	<code>src/database.py</code> → v17.19	✓
27	<code>src/oie_database.py</code> → v17.19	✓
28		✓

#	Task	Status
	schemas/migrate_v17_14_oie.sql → v17.19	
29	templates/base.html → v17.19	✓
30	templates/dashboard.html → v17.19	✓
31	templates/settings.html → v17.19	✓
32	templates/opportunities.html → v17.19	✓
33	templates/trades.html → v17.19	✓
34	tradex-frontend/app/layout.tsx → v17.19	✓
35	tradex-frontend/app/page.tsx → v17.19	✓
36	tradex-frontend/app/opportunities/page.tsx → v17.19	✓
37	tradex-frontend/app/settings/page.tsx → v17.19	✓
38	Plot budget verified: 33/64 (unchanged)	✓
39	ZERO logic/filter/alert architecture changes confirmed	✓

Visual Change Summary

FIX 1: P&D Equilibrium Line (CRITICAL)

Property	v17.18	v17.19
Label tracking	<code>label.new()</code> (untracked, accumulates)	<code>var label pdEqLabel + label.delete()</code>
Label text	"EQ"	" EQ " (padded for visibility)
Label background	<code>color.new(color.black, 0)</code> (opaque)	<code>color.new(color.black, 20)</code> (slight transparency)
Line	width=4, white, solid, extend.right	Unchanged

FIX 2: HUD High-Contrast Background

Property	v17.18	v17.19
Background	<code>color.new(color.black, 70)</code> (30% opacity)	<code>color.new(color.black, 40)</code> (60% opacity)
Frame border	None (frame_width=0)	<code>color.new(color.white, 80)</code> , frame_width=1

FIX 3: HUD Float Mode

Property	Details
New input	<code>hudModeInput</code> — "Fixed" (default) / "Hover"
Fixed mode	Always 60% opacity
Hover inactive	15% opacity (transp 85)
Hover active	60% opacity — triggers on <code>barstate.islast</code> or recent signal (<5 min)

FIX 4: HUD Size Optimization

Property	v17.18	v17.19
Content text size	<code>size.normal</code>	<code>size.small</code> (~15% smaller)
Header text size	<code>size.normal</code>	<code>size.normal</code> (unchanged)
Label names	Full names	Shortened (Align, KZ, POI, Confl, AMD, Trade, Entry, Stage, Alert, Signals)

FIX 5: Text Priority Hierarchy

Role	Color	Usage
Header labels	<code>color.white</code>	Row labels (Bias, Align, KZ, etc.)
Active values	<code>color.lime</code>	Aligned state, positive signals
Neutral	<code>color.new(color.gray, 30)</code>	Inactive/static values
Warning	<code>color.orange</code>	Caution states
Invalidated	<code>color.red</code>	Conflicts, errors

Modified Files (19 total)

Pine Script (2)

- `smc_premium_discount_indicator_v17.19.pine` — Main indicator
- `smc_premium_discount_indicator_v17.18_backup.pine` — Backup

Python Backend (6)

- `app.py`, `src/webhook_server/routes.py`, `src/oie_processor.py`
- `src/decoders.py`, `src/database.py`, `src/oie_database.py`

HTML Templates (5)

- `templates/base.html`, `templates/dashboard.html`, `templates/settings.html`
- `templates/opportunities.html`, `templates/trades.html`

SQL (1)

- `schemas/migrate_v17_14_oie.sql`

Next.js Frontend (4)

- `tradex-frontend/app/layout.tsx`, `tradex-frontend/app/page.tsx`
- `tradex-frontend/app/opportunities/page.tsx`, `tradex-frontend/app/settings/page.tsx`

Documentation (1)

Plot Budget Report

Component	Count
<code>plot()</code> visible	2
<code>plot()</code> display=none	23
<code>plotshape()</code>	6
<code>bgcolor()</code>	3
<code>alertcondition()</code>	4
Total	33/64

Next Steps

1. Copy Pine Script to TradingView and verify compilation
2. Confirm EQ line renders correctly on chart (no label accumulation)
3. Test Float Mode: switch between Fixed/Hover and verify opacity changes
4. Verify HUD compact size and text hierarchy colors
5. Deploy backend to Railway
6. Trigger Vercel redeploy for frontend
