

Alert Naming Fix — Deployment Report

Date: 2026-05-24
Commit: eed9026
Branch: main
Railway Status:  Deployed & Healthy

Changes Made

1. smc_premium_discount_indicator_v17.54.pine

Location	Before	After
alertcondition() messages (×4)	"alert": "A_PLUS_SNIPER_BUY" etc.	"alert": "A+ SNIPER BUY" etc.
alert() calls (×4)	"alert": "A_PLUS_SNIPER_BUY" etc.	"alert": "A+ SNIPER BUY" etc.

Total replacements: 8 (2 each for SNIPER BUY, SNIPER SELL, RETRACE LONG, RETRACE SHORT)

2. src/oie_processor.py

- Updated comments and docstring examples to reflect new canonical names
- **Backward compatibility preserved:** `_V17_54_ALERT_MAP` retains both underscore and space keys mapping to the same OIE types

Alert Name Mapping (final state)

Pine Script emits	<code>_V17_54_ALERT_MAP</code> resolves to
A+ SNIPER BUY	sniper_long
A+ SNIPER SELL	sniper_short
RETRACE LONG	retrace_long
RETRACE SHORT	retrace_short
COUNTER BUY (future)	counter_long
COUNTER SELL (future)	counter_short

What Was NOT Changed

-  Signal firing logic
-  SL/TP calculations
-  Subtype logic

- ✗ HUD / zone rendering
- ✗ settings.html / frontend templates
- ✗ Any files other than the two listed above

Health Check

```
{"service": "SMC Performance Tracker", "status": "ok", "version": "v17.54"}
```
